

The CarbON [CII]line in post-rEionization and ReionizaTiOn epoch project (CONCERTO)

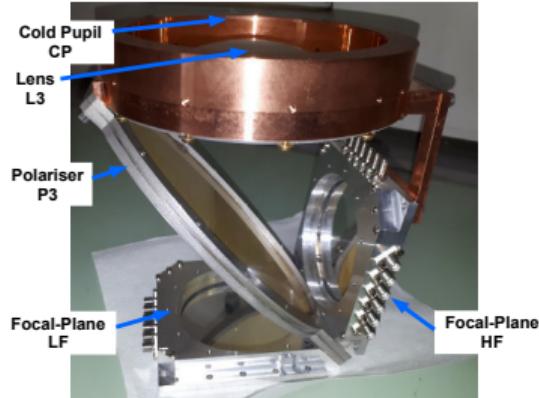

Alexandre Beelen

(on behalf of the CONCERTO Collaboration)

Fact Sheet

- Focal plane
 - Kinetic Inductance Detectors (KIDs)
 - Based on the NIKA2 camera
 - FOV $D = 20'$, $f\lambda$ samp. 2×2168
 - Frequency range: 120 - 360 GHz
 - $f_{\text{samp}} = 3.7$ kHz
- Cryostat
 - $^3\text{He} - ^4\text{He}$ dilution 70mK
 - 4K standard 2 stages pulse-tube
- Martin Puplett Interferometer FTS
 - Warm optic
 - Cont. mirror sweep at a few Hz
 - Constant $\delta\nu$, $R = 100$ to 300

Concerto Coll. +20

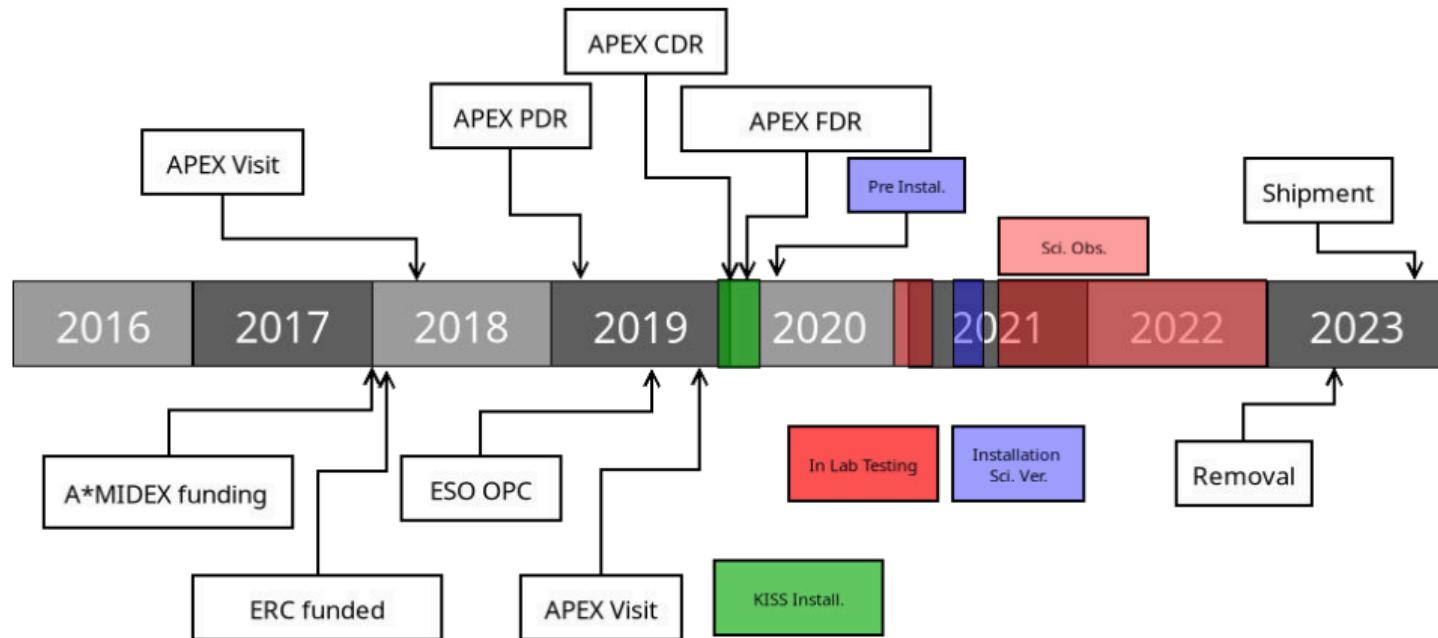

By Jgardiazabal — Personnel Work, CC BY-SA 3.0

Atacama Pathfinder EXperiment

- D = 12 m
- 5105 m @ Chajnantor
- sub-mm Antenna
- surface upgraded in 2018
- MPIfR / ESO / OSO
(55 / 32 /13)
- Extension Agreement until **end of 2022**

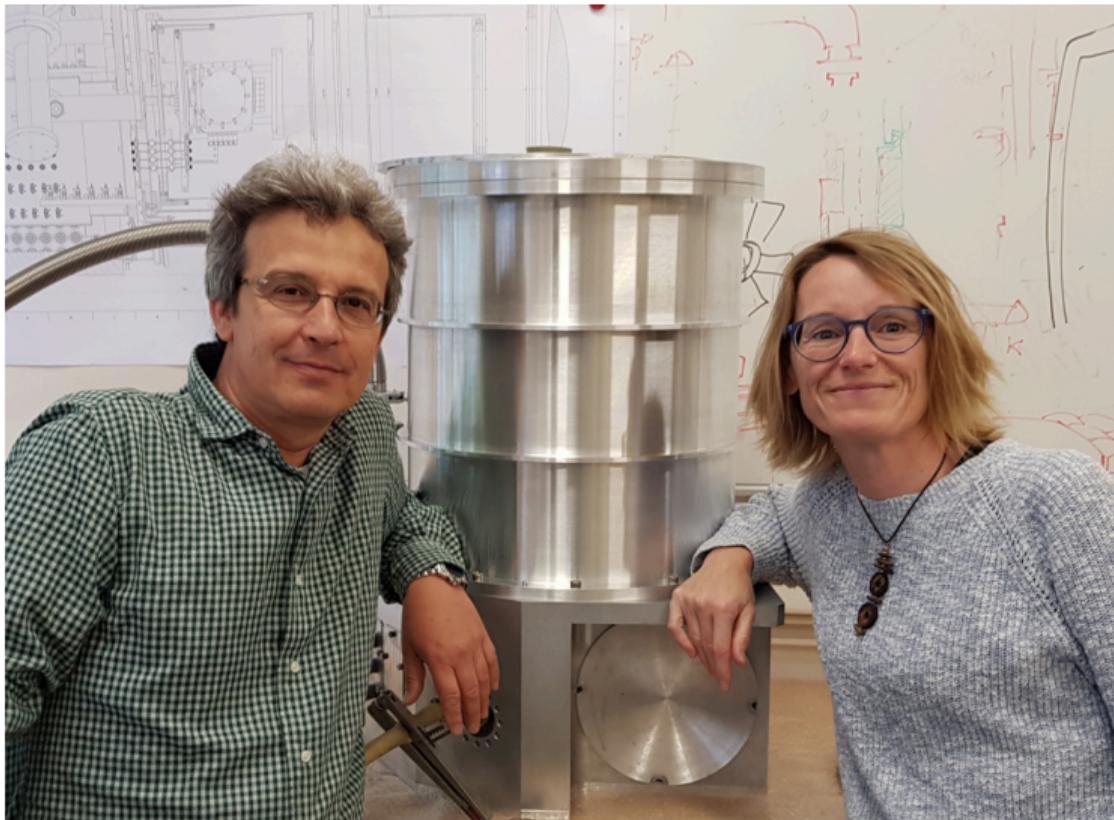

The CONCERTO Project

FOCUS yearly support
KIDs R&D / CONCERTO filters / ...

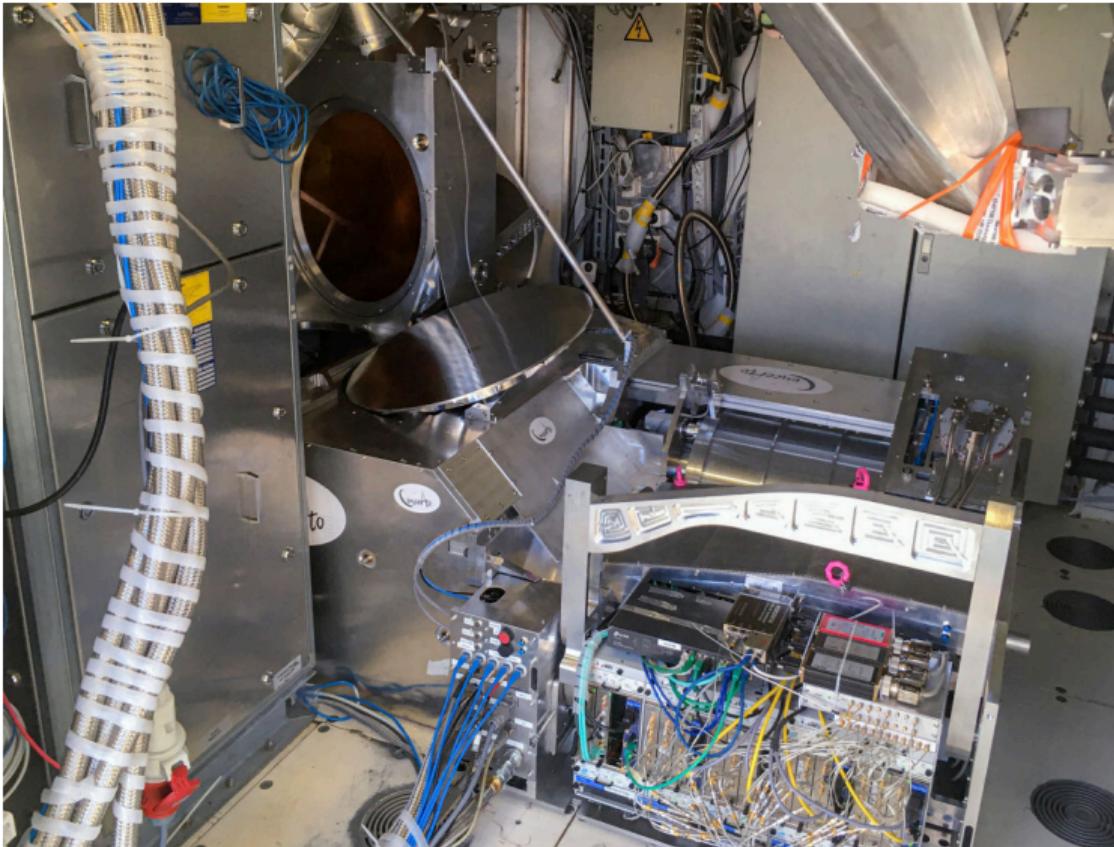

June 2019

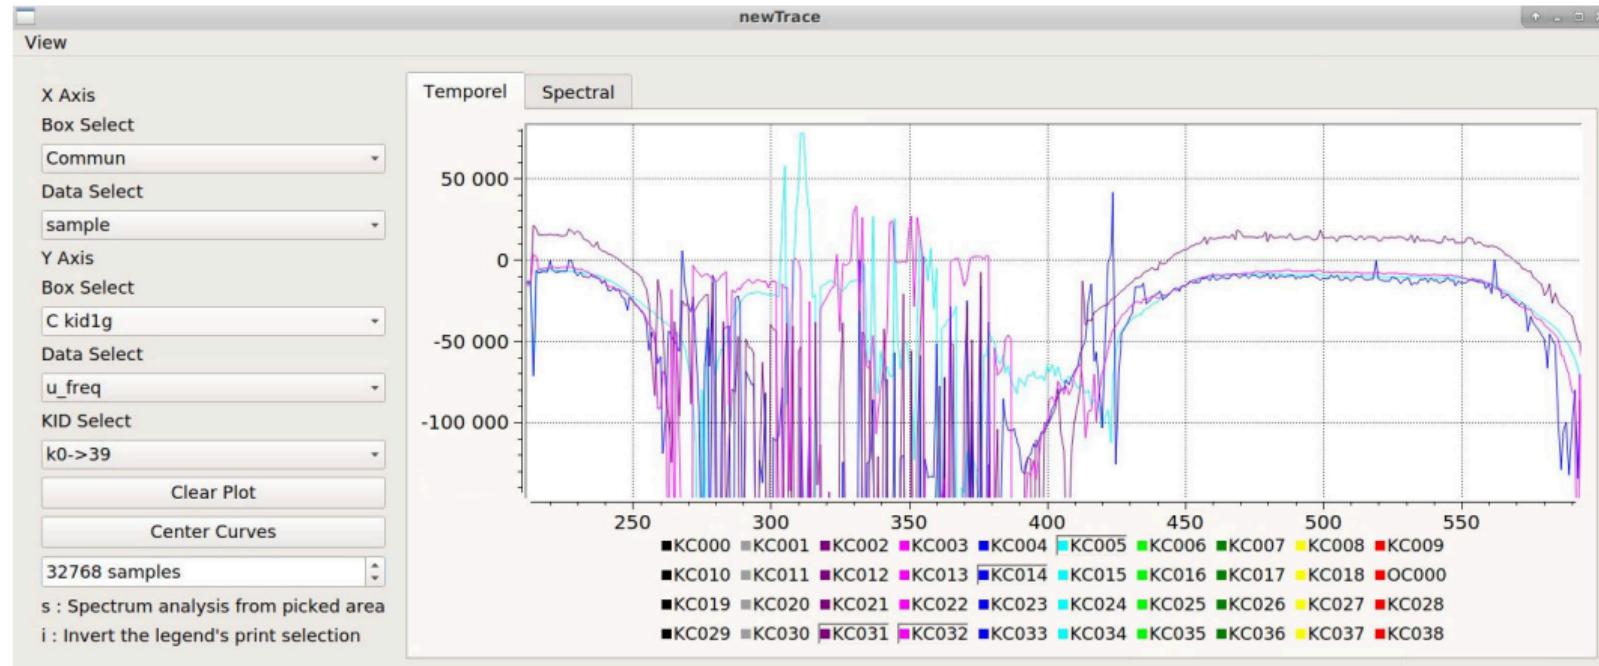

Leaking cryostat

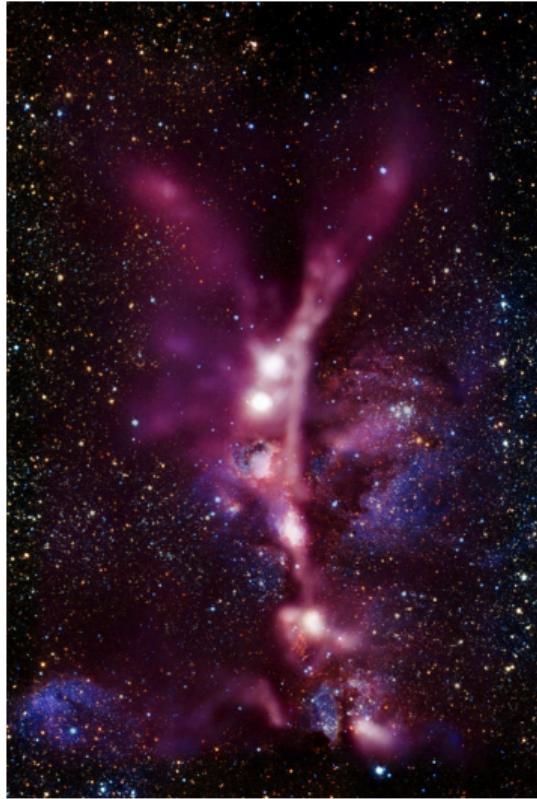

April 14th, 2021

Installation Finished !

Credit: ESO/J. Emerson/VISTA

NGC 6334

Cat's Paw Nebula

- Telescope time: 16 min.
- 37'x25'
- Quickly demonstrating the mapping potential in imaging.
- All the fainter structures in this map are confirmed by existing Artemis, Herschel, SCUBA observations

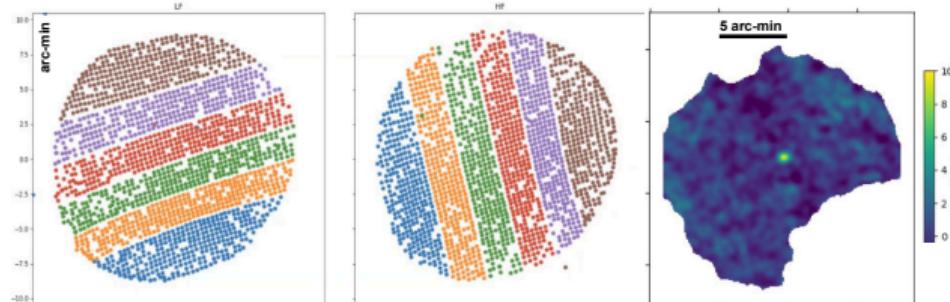

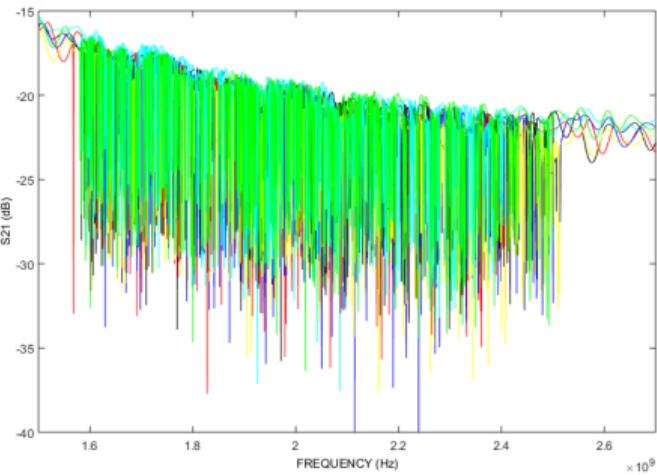

A New Low Res Spectral Imaging Instrument @ APEX

Monfardini+22

On Sky Performances

2021

- Fully funct. 90% of 4304 kids
- Sensitivity in agreement
- ~50 Hz optical noise
- Interferograms stability
- Optical aberrations

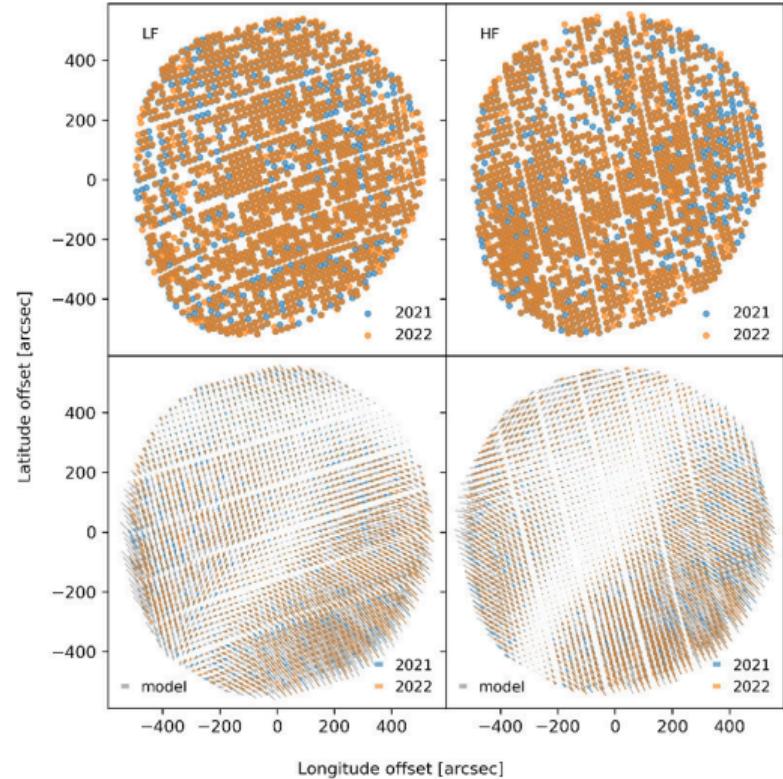

CONCERTO Performance Assessment in Continuum

Hu et al. to be subm.

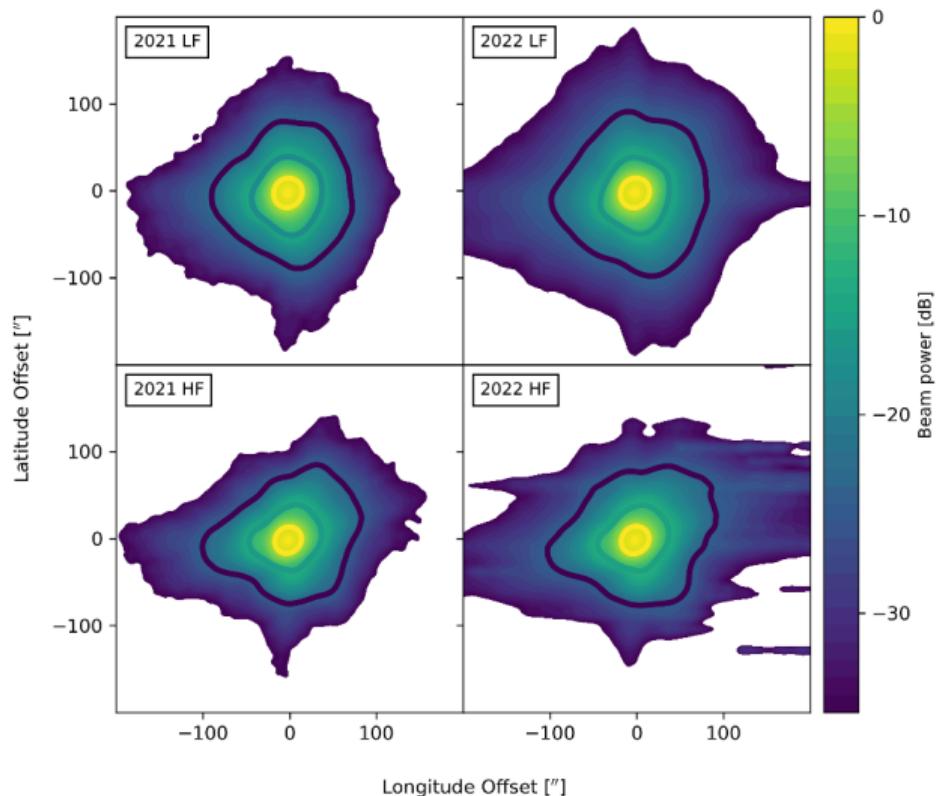

Focal Plane Reconstruction

- ~ 71% of valid kids
- Large FOV
- Stable between 2 years
- cross-talks (~15%)
- lack of stat. (~ 5%)
- FOV Deformation
- ellipticity

CONCERTO Performance Assessment in Continuum

Hu et al. to be subm.

Beams

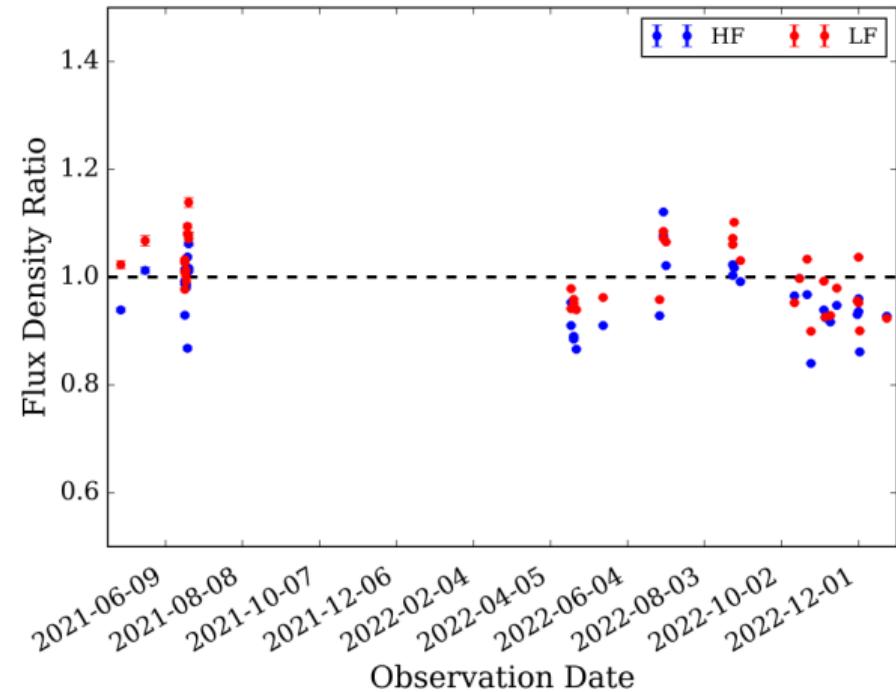

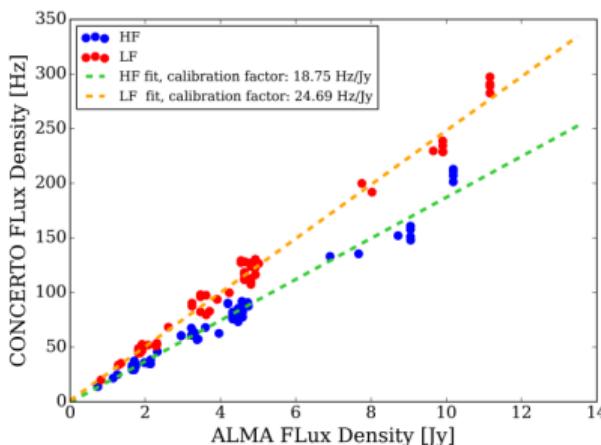

- Main beam
- 2 Error Beams
- down to -30dB !
- ellipticity
- Non Gaussian EB

CONCERTO Performance Assessment in Continuum

Hu et al. to be subm.

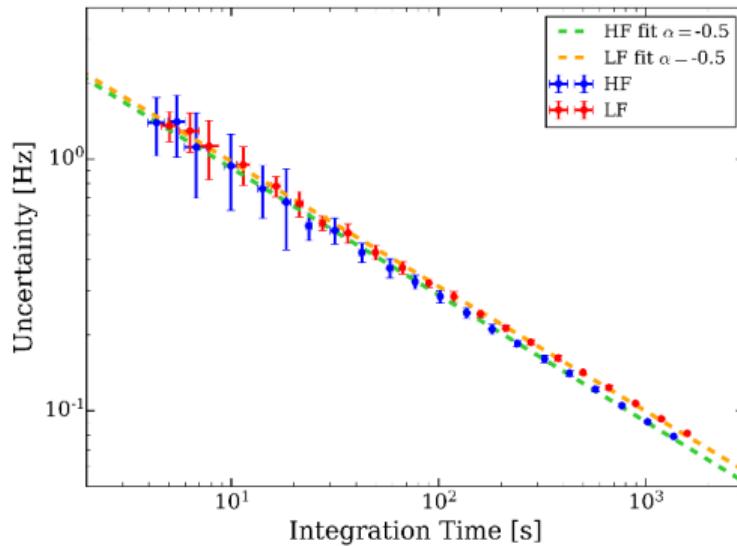

Photometric Calibration

- Derived on Uranus
 - LF 25.5 ± 0.9 Hz/Jy
 - HF 19.4 ± 0.6 Hz/Jy
- Checked on Mars
- Checked on QSO (ALMA)

CONCERTO Performance Assessment in Continuum

Hu et al. to be subm.

Sensitivities

- Noise PS
- Skydip
- Deep field : AS2UDS / COSMOS

NEFD

LF $118.8 \pm 0.3 \text{ mJy.s}^{1/2}$

HF $152.4 \pm 0.6 \text{ mJy.s}^{1/2}$

$$\text{rms}(t) \propto t^{-0.52 \pm 0.05}$$

$$(112 \pm 48 \text{ mJy.s}^{1/2})$$

$$(146 \pm 30 \text{ mJy.s}^{1/2})$$

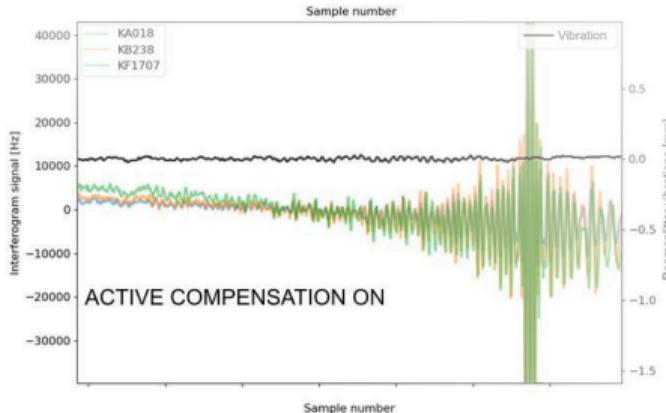

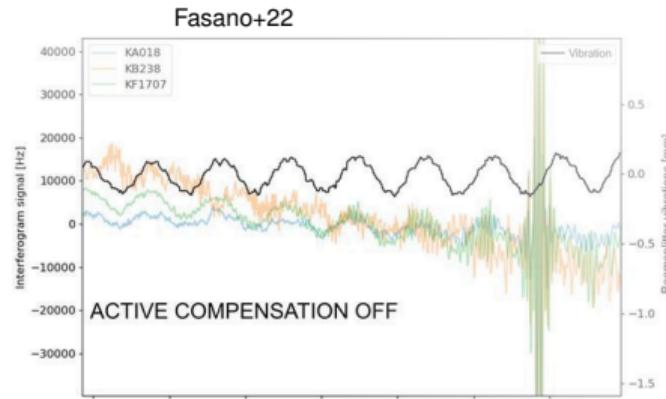

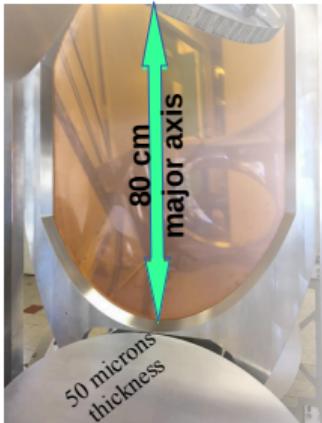

CONCERTO Spectroscopic Mode

On Going...

Systematic effect : Polarizer vibrations

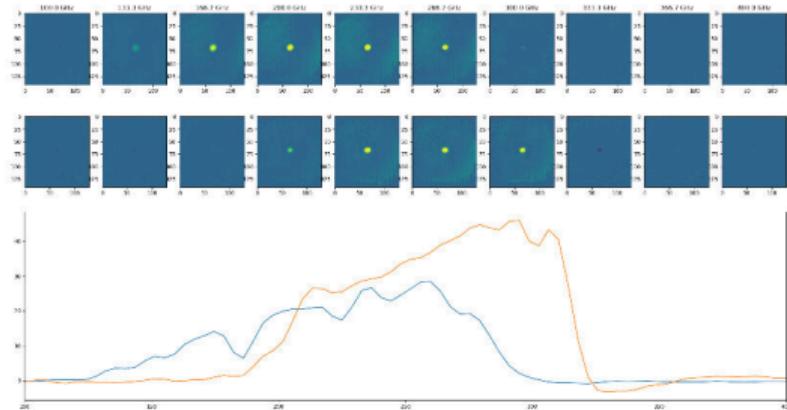

- Resonance frequencies (~ 47 Hz)
- OPD random noise
- Noise Cancelation down to ~ 10 Hz
- ... in open space since 02/2022

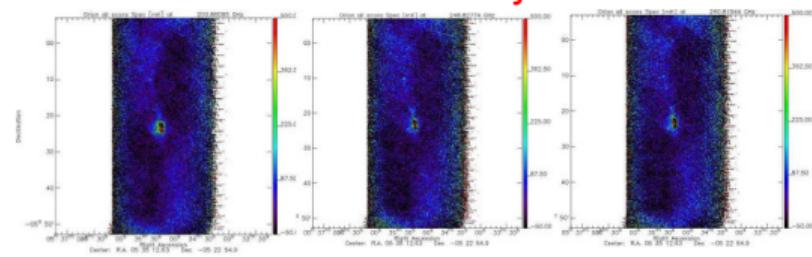

CONCERTO Spectroscopic Mode

On Going...

Mars – Preliminary

Orion – Preliminary

J. Macias Perez / F.X. Désert (priv. comm.)

Remaining Challenges

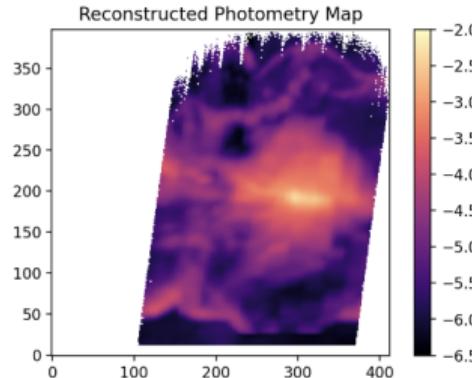

- Detector non linearities
- Precise Bandpasses
- Sailing effect
- Zero Path Difference
- Atmospheric emission
- ...

CONCERTO Simulation Mode

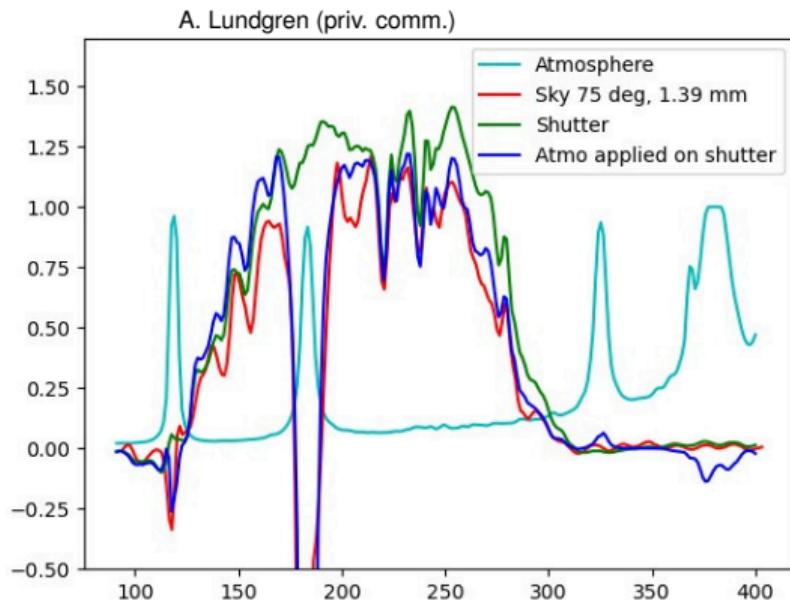

A. Fasano et al. in prep.

End-to-end Simulations

- Telescope scans / Laser course
- MPI reference
- Atmospheric emission
- Systematics

C. Dubois (priv. comm.)

CONCERTO Observing Programs

815 TB of uncomp. data

CONCERTO LP

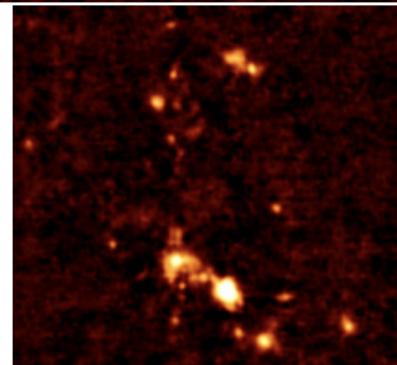

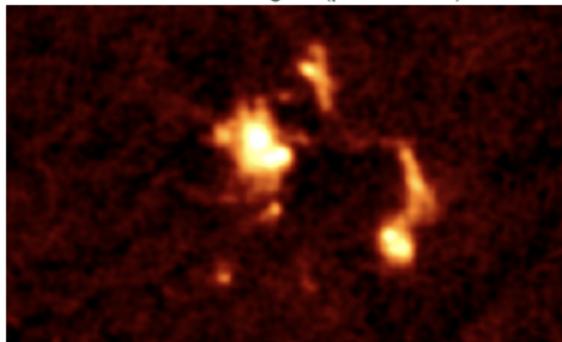

LIM [CII]

- COSMOS field
- 1.4 deg²
- 800 hrs ESO/OSO + 65 hrs CL

Open Time Programs

- 6 SZ Clusters
- 3 ISM studies
- 2 Evolved Stars
- ~ 465 hrs

RCW 122 – A. Lundgren (priv. comm.)

W33 – A. Lundgren (priv. comm.)

CONCERTO Removal

2023/05/21

2023/05/23

End of Observations

- Back to Europe (maybe?)
- 2 PhD thesis
- 2 PostDocs

Beginning of Data Analysis

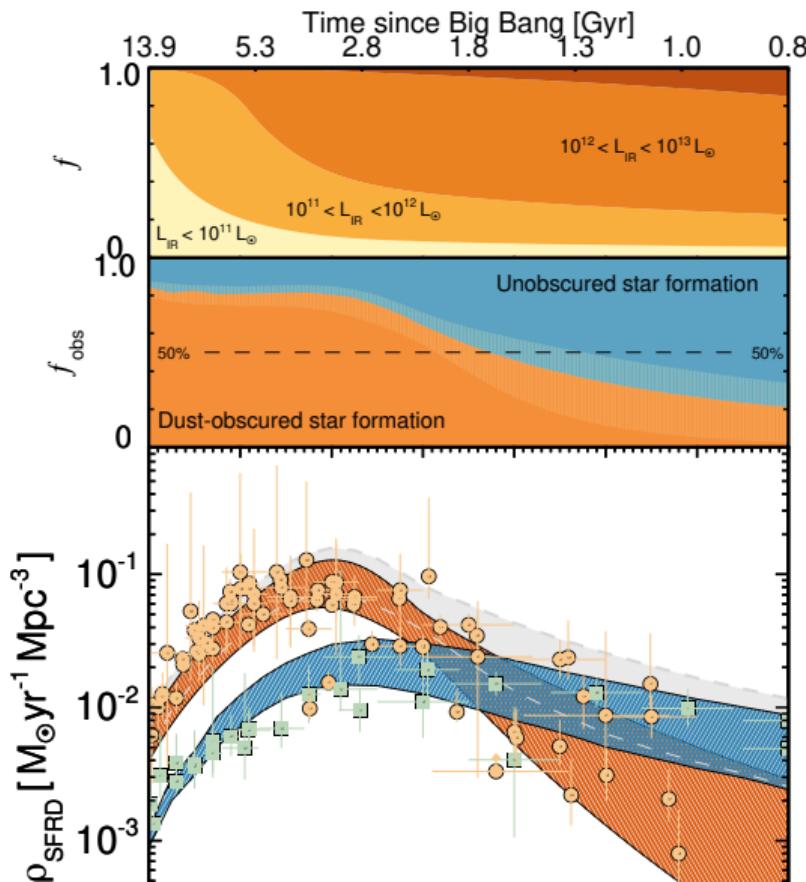

- Lab measurements (?)
- 2 PostDocs

The First Day of the Rest of the CONCERTO Project

Data Analysis is still on-going for the spectroscopic side
Stay tuned !

Why [CII] Intensity Mapping ?

SFRD vs $z < 2$

- Many observations
- Optical & IR

SFRD vs $z > 4$

- Fewer observations
- Model dependence
- DSFGs contribution ?

[CII]

158 μ m

- Brightest emission line in the

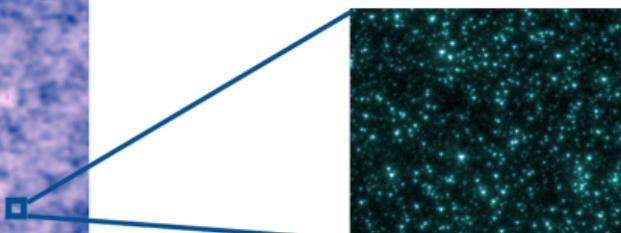

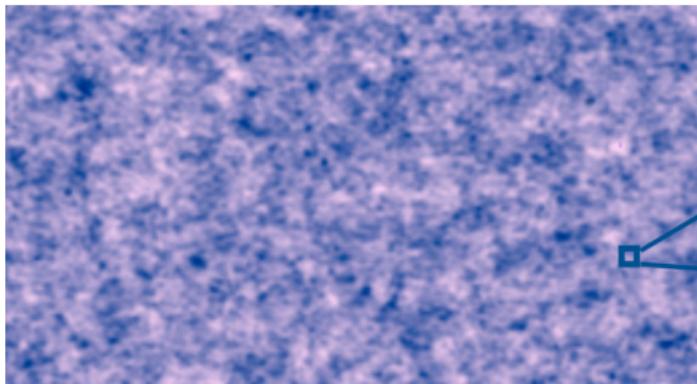

Why [CII]Intensity Mapping ?

Line Intensity Mapping

- Angular fluct. of Brightness
- Including faint sources
- Model dep.
- Foregrounds

Galaxy Surveys

- Individual sources
- Precise measurements
- very limited sample
- limited area

Galaxy surveys (HST,
Spitzer, JWST, ALMA)
